- "xx" stands for the capacity of the indoor unit / "xx" especifica la potencia de la unidad interior.

- **!** Depending on the AC model, some high-power demand wired remote controllers, such as the **CZ-RTC5B**, might not work together with the Gateway due to consumption reasons. In that case, you can replace the wired remote controller with a less power-demanding model. Another option is to use the **INBACPAN001R100**, **INWFIPAN001R100**, or **INWMPPAN001R000** references, which can use an external power supply.
